

CHART ACCOMPANYING "THE SOCIALIST NETWORK" BY NESTA H. WEBSTER.

This chart is arranged latitudinally in chronological order throughout, and longitudinally according to countries.

A single line between the various organisations signifies connection or descent, a double line thus == denotes transformation of one society into another or change of name. Thus a single line shows that the Central Labour College arose out of the Fabian League or that the C.P.G.B. is connected with the Young Communist League; whilst a double line shows that the British Socialist Party became the Communist Party of Great Britain.
